

STUDER Training Courses

Training at the STUDER Customer Center

At our production center in Steffisburg (Switzerland) we offer a wide variety of courses, which optimally prepare our customers for a broad range of grinding tasks and challenges. Our offering ranges from basic courses on cylindrical grinding through to specific training courses on STUDER software tools.

In order to meet the requirements of our international clients, our instructors offer the respective courses in four different languages. The courses last between ½ and 4 ½ days and are all held at our Steffisburg location.

Advantages of STUDER training courses

- 4 quiet, bright training rooms with offline programming stations
- 13 machines of the latest generation
- 8 well trained instructors with vast grinding experience
- Availability of tooling and practice sections guaranteed
- Latest version of training documents
- High proportion of practical work with exercises
- Factory tour including visit to STUDER Museum (Granitanorama)

Overview of our complete training offering

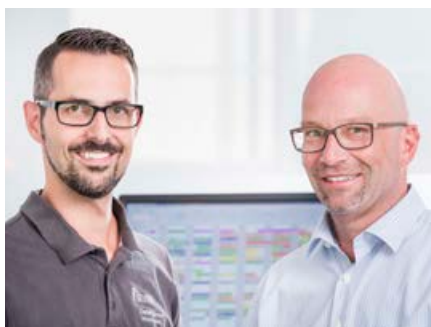

The full STUDER training offering can be found directly on our website – www.studer.com (under Customer Care, Qualification).
